Double Sided Straw Blanket

SRW Double Sided Straw Blankets are made with uniformly distributed 100% agricultural straw and two polypropylene nets securely sewn together with degradable thread. The tightly compressed blankets are wrapped and include a product label, code, and are palletized for easy transportation. The Double Sided Straw Blankets have a functional longevity of approximately 12 months, but will vary depending on soil and climatic conditions, and is suitable for slopes 2:1 or less and low flow channels. SRW Single Sided Straw Blankets meets Type 2.D specification requirements established by the Erosion Control Technology Council (ECTC) and Federal Highway Administration’s (FHWA) FP-03 Section 713.17.
